

Project Executable Files

Date	15 July 2026
Project Name	Smart Lender
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	
2	README / Setup Guide (instructions to run the project)	
3	requirements.txt / package.json / dependency file	
4	Database schema / seed files (if applicable)	
5	Environment configuration file (.env.example similar) or	
6	Deployed application URL (if hosted)	
7	APK / Executable binary (if applicable for mobile/desktop apps)	
8	Dockerfile / Containerization config (if applicable)	
9	Test files and test results	
10	Demo video or walkthrough (if required)	

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
Smart-Lender/
app.py
requirements.txt
README.md
loan_prediction.csv
models/
DecisionTree.pkl
RandomForest.pkl
KNN.pkl
XGBoost.pkl
templates/
static/
notebooks/:
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	IBM Cloud Deployment URL
Login Credentials (Demo)	[Provide demo username and password for evaluator access]
Platform / Hosting Provider	[e.g., Render, Vercel, AWS, Heroku, Azure]
Repository Link	GitHub Repository Link
Demo Video Link	Google Drive / YouTube

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:

- Python 3.10.
- Flask, Scikit-learn, XGBoost, Pandas, NumPy

Step 1: Clone the repository.

Step 2: Install dependencies using `pip install -r requirements.txt`

Step 3: Run `python app.py`

Step 4: Open `http://127.0.0.1:5000`

Step 5: Enter applicant details and click **Predict**.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Prediction depends on quality of input data	Provide complete and accurate applicant details
2	Model accuracy may reduce over time.	Retrain with updated banking datasets.
3	Supports structured loan data only.	Future versions will support document-based verification.
